FOR IMMEDIATE RELEASE

BHI Energy Appoints Jimmy Morgan as Chief Operating Officer

PLYMOUTH, MA, April 11, 2012 – BHI Energy (BHI) today announced that Jimmy Morgan has been named Chief Operating Officer of the Company's Power Services Division. Mr. Morgan leads the operations of maintenance companies Power Equipment Maintenance, AMES and Team One Civil Maintenance, which comprise the Division. He is based out of the Piedmont, South Carolina office and reports to Bob Decensi, President & Chief Executive Officer of BHI Energy.

Mr. Morgan brings more than 22 years of worldwide managerial, operational and financial experience within the nuclear and other energy industries to the Company. Prior to joining BHI, Mr. Morgan worked for Westinghouse Electric Corporation for six years, where he held executive management positions including Vice President of Installation and Modification Services and President of wholly owned subsidiary Machining and Welding, Inc. During this time responsibilities included Profit & Loss Statement management, performance improvement, key strategy development and growth implementation. Previous experience includes project and systems management for AREVA and management positions in engineering, systems, sales and marketing for Duke Energy.

Bob Decensi comments, "BHI Energy is pleased to bring Jimmy on board. His addition to the leadership team within our Power Service Division will further strengthen BHI's maintenance service capabilities; as well as benefit our customers with the extensive knowledge and experience he brings to the Company."
